To the Honourable F. COCHRANE,  
Minister of Railways and Canals.

SIR,—I have the honour to submit the report of the Comptroller of Statistics in relation to the telephone interests of the Dominion of Canada for the year ended June 30, 1914.

I have the honour to be, sir,  
Your obedient servant,

A. W. CAMPBELL,  
*Deputy Minister of Railways and Canals.*

## OFFICE OF THE COMPTROLLER OF STATISTICS,

OTTAWA, January 15, 1915.

A. W. CAMPBELL, Esq., C.E.,  
Deputy Minister of Railways and Canals.

SIR,—I have the honour to submit herewith Telephone Statistics for the year ended June 30, 1914.

The steady growth of telephone interests is revealed by the statistical matter presented. The number of units which reported in 1913 was 1,075. In 1914 reports were received from 1,136 operating organizations.

There has been a distinctly noticeable movement during recent years toward the consolidation and centralization of telephone interests in populous communities, particularly in the province of Ontario. Unions reduce the number of reporting units, and have for their chief object the prevention of waste in operating cost.

It should not be assumed, however, that reports were received from every telephone corporation or private interest throughout the Dominion. It is probable that the full number of units exceeds 1,200. Every effort was made to secure returns from all of these; but, for various reasons, the effort was not absolutely successful.

The telephone business of the country is expanding rapidly. The difficulty in the way of obtaining reports from all the organizations arises from two causes: First, a lax system in the various provinces with regard to the registration of companies which have reached the operating stage; and second, the somewhat haphazard way in which some of the co-operative companies carry on business. For the most part these are purely local corporations, covering a small field, and giving little heed to accounting methods. In the face of such a situation, it is felt that the best has been done that was possible under the circumstances.

The reporting forms sent out are exceedingly simple in character. At the outset, an effort was made to get more or less elaborate reports; but that plan had to be abandoned for the time being. The schedules only led to confusion in the minds of the officers in charge of rural companies, and resulted in quite unsatisfactory and incomplete returns. Still worse, they were the excuse in many instances for neglect to report at all. The forms were therefore reduced to a series of questions, elementary and incapable of being misunderstood.

The educational process should now be regarded as reasonably complete, and the time is at hand when the larger corporations might properly be placed on a more comprehensive reporting basis, somewhat like that which is applied to other public utilities. As for the small units occupying rural fields of service, it will perhaps always be necessary to deal with them much in accordance with the present plan.

During 1914 the department had the continued co-operation of the Saskatchewan Government with respect to telephone reports from that province. As time proceeds it ought to be practicable to secure similar help from other provincial governments.

## CAPITALIZATION AND COST.

Capital liability increased by \$10,444,879.32 in 1914, as compared with 1913, bringing the total up to \$70,291,884.15.

Following are the facts in this regard, with the division of liability, for 1914 and the preceding years:—

The distribution of capital liability, by provinces, in 1912, 1913, and 1914 was as follows:—

It must be borne in mind that the entire capitalization of the Bell Telephone Company is, in the foregoing table, attached to the province of Quebec, the headquarters of that corporation being in Montreal; but the company has its larger interests in Ontario. It would be impracticable to make a division.

Capital liability in 1914 was equal to \$134.88 per telephone, as against \$129.13 in 1913.

The cost of telephone systems was returned at \$80,258,356 in 1914—an advance of \$11,043,384.55 over the preceding year

5 GEORGE V., A. 1915

The total cost in 1913 and 1914 was distributed among the various provinces as follows:—

	1913.	1914.
	\$ cts.	\$ cts.
Nova Scotia.....	3,323,901 72	3,505,155 94

Yukon.....		170,179 78
Total.....	69,214,971 45	80,258,356 00

Here again allowance must be made for the facts with respect to the Bell Telephone Company, which have the effect of unduly inflating the figures with respect to the province of Quebec, and of reducing them in relation to Ontario.

EARNING AND OPERATING EXPENSES.

Gross earnings in 1914 had a total of \$17,297,268.98, or \$2,399,990.75 more than in 1913.

Operating expenses aggregated \$12,882,402.32, as compared with \$11,175,-689.47 for the preceding year.

Net earnings, as represented by the difference between gross earnings and operating cost, were \$4,414,866.66. This result was better by \$657,277.88 than in 1913. Many of the rural organizations are on a co-operative basis, and seek merely to balance income and outgo.

Gross earnings in 1914 were equal to \$33.16 per telephone in use, as compared with \$32.13 in 1913 and \$33.09 in 1912.

Operating expenses represented an average of \$24.72 per telephone, as against \$24.10 in 1913.

Gross earnings and operating expenses were distributed among the provinces in 1913 and 1914 as follows:—

The analysis in table 16 takes cognizance of deficits, and payments out of reserves; so that the final balance varies slightly.

# EQUIPMENT.

The number of miles of telephone wire in use in 1914 was 1,343,090.07—an increase of 250,503.30 as compared with 1913.

The foregoing wire mileage for 1914 was divided as follows: Urban, 962,947.49; rural, 380,142.58.

There was 1 mile of telephone wire in use for every 6.0 of the population, as against 6.8 in the preceding year. The population of Canada on March 31 last was estimated by the Census Office to be 8,075,000.

The number of telephones in use was 521,144, representing a gain of 57,473 over 1913.

There was one telephone in use for every 15.5 of the population, which places Canada in a foremost position among the nations with respect to telephone service. Only one other country, the United States, is known to have as large a number of telephones in use on the basis of population.

Details with respect to wire mileage and telephones will be found in succeeding summaries and tables.

The wire mileage for 1913 and 1914 was divided into classes as follows:—

## EMPLOYEES.

The telephone organizations of Canada had 16,799 employees in their service in 1914, as compared with 12,867 reported for 1913.

The total of salaries and wages was returned as being \$8,250,253.19, which was \$1,410,944.34 more than for 1913.

It should be understood, however, that in several important instances in 1913 the numbers returned applied only to operators rather than to employees of all classes.

Following is a comparative summary, by provinces, of the number and remuneration of employees:—

## TELEPHONE TARIFFS.

As was explained last year, it is quite impracticable to prepare a table of telephone tariffs. The facts in that regard have been reported, and they will be kept on file for use as occasion may arise.

I have the honour to be, sir,

Your obedient servant,

J. L. PAYNE,

*Comptroller of Statistics.*
